

Data Flow Diagram — AI Cost Autopilot

Levels 0, 1 and 2 · Gane–Sarson notation

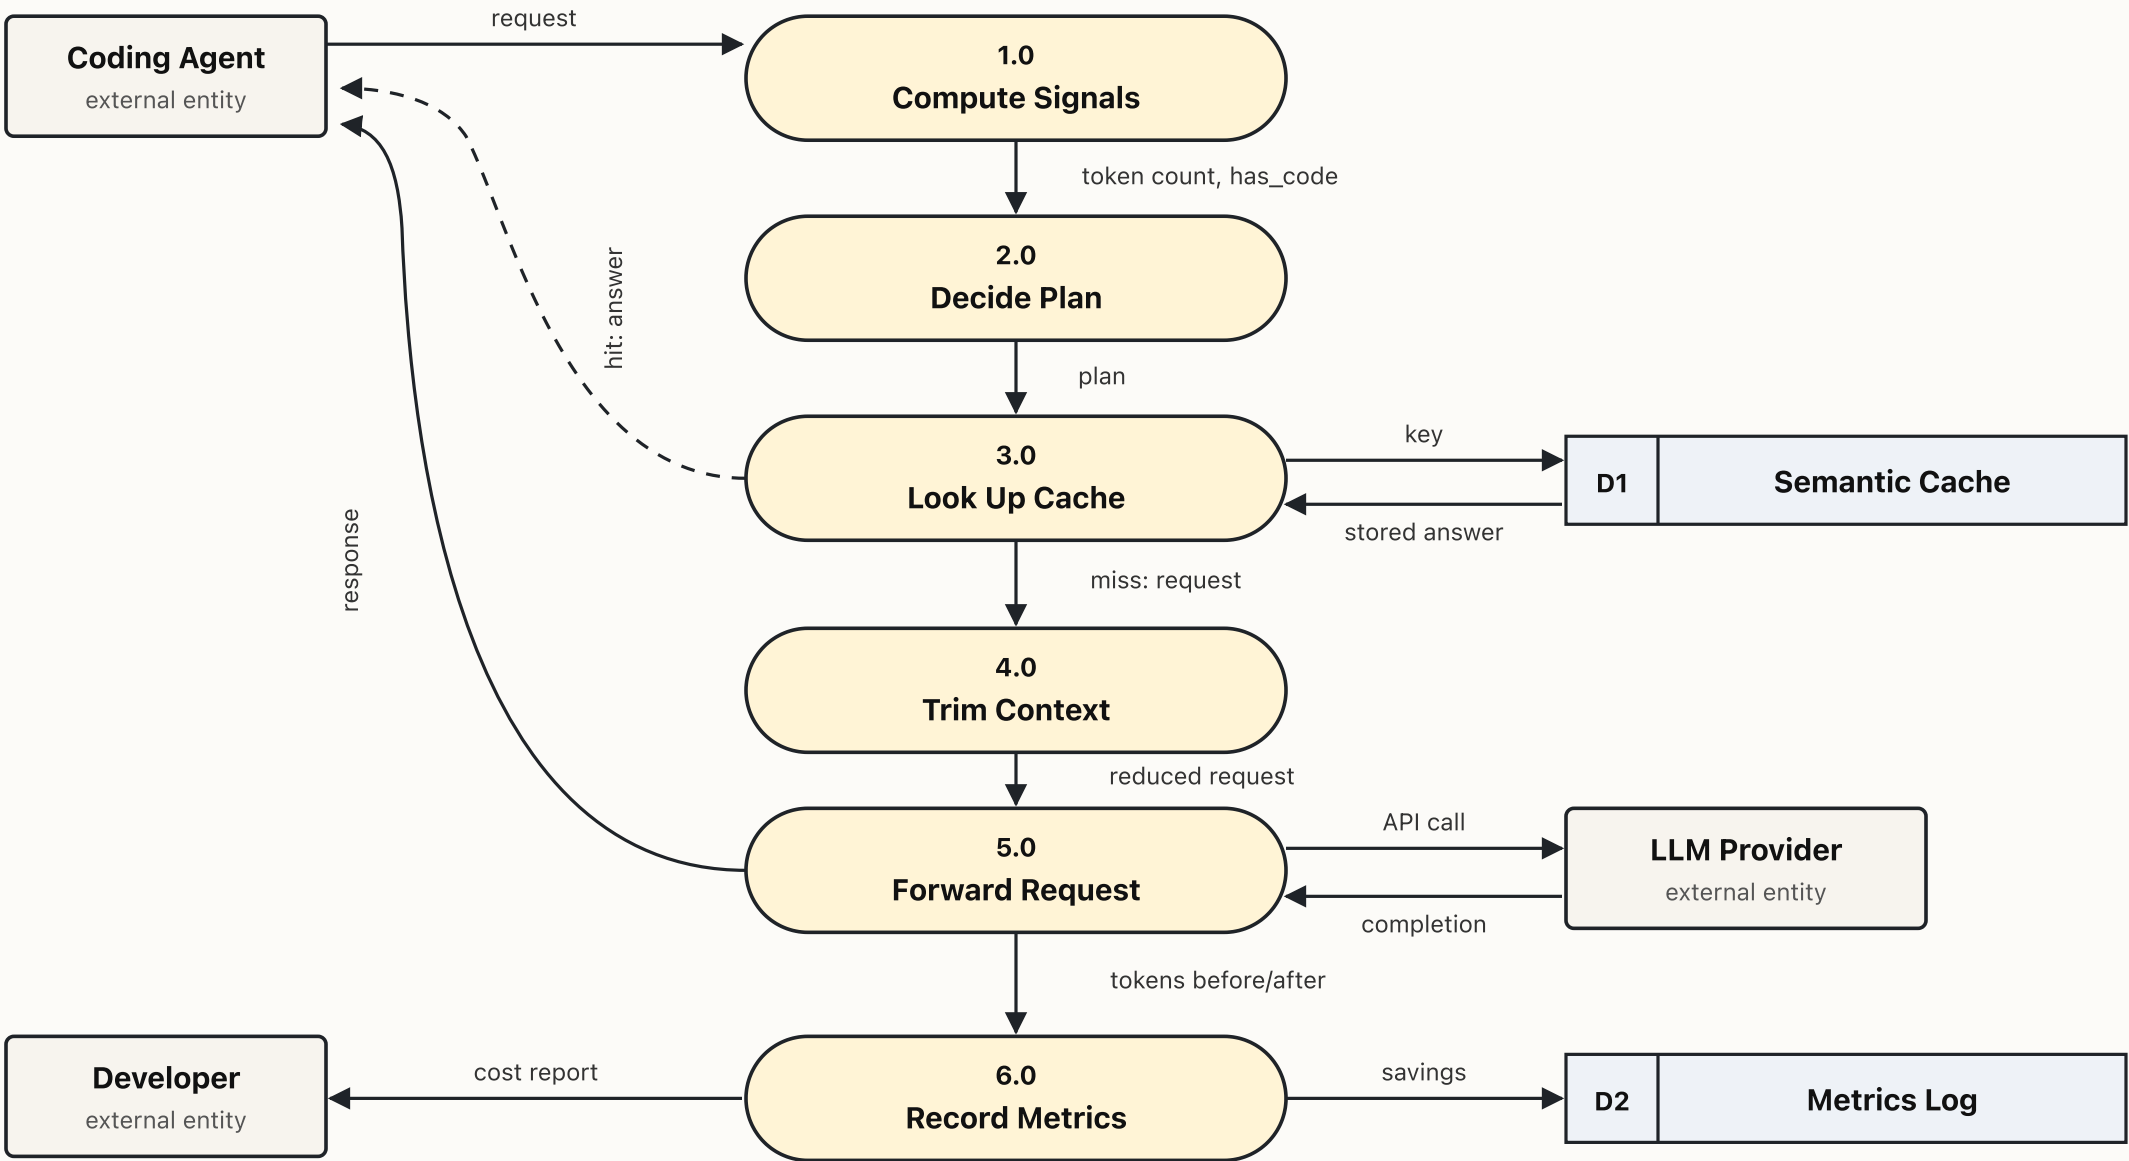

Level 0 — Context

the whole system as one process, and everything outside it

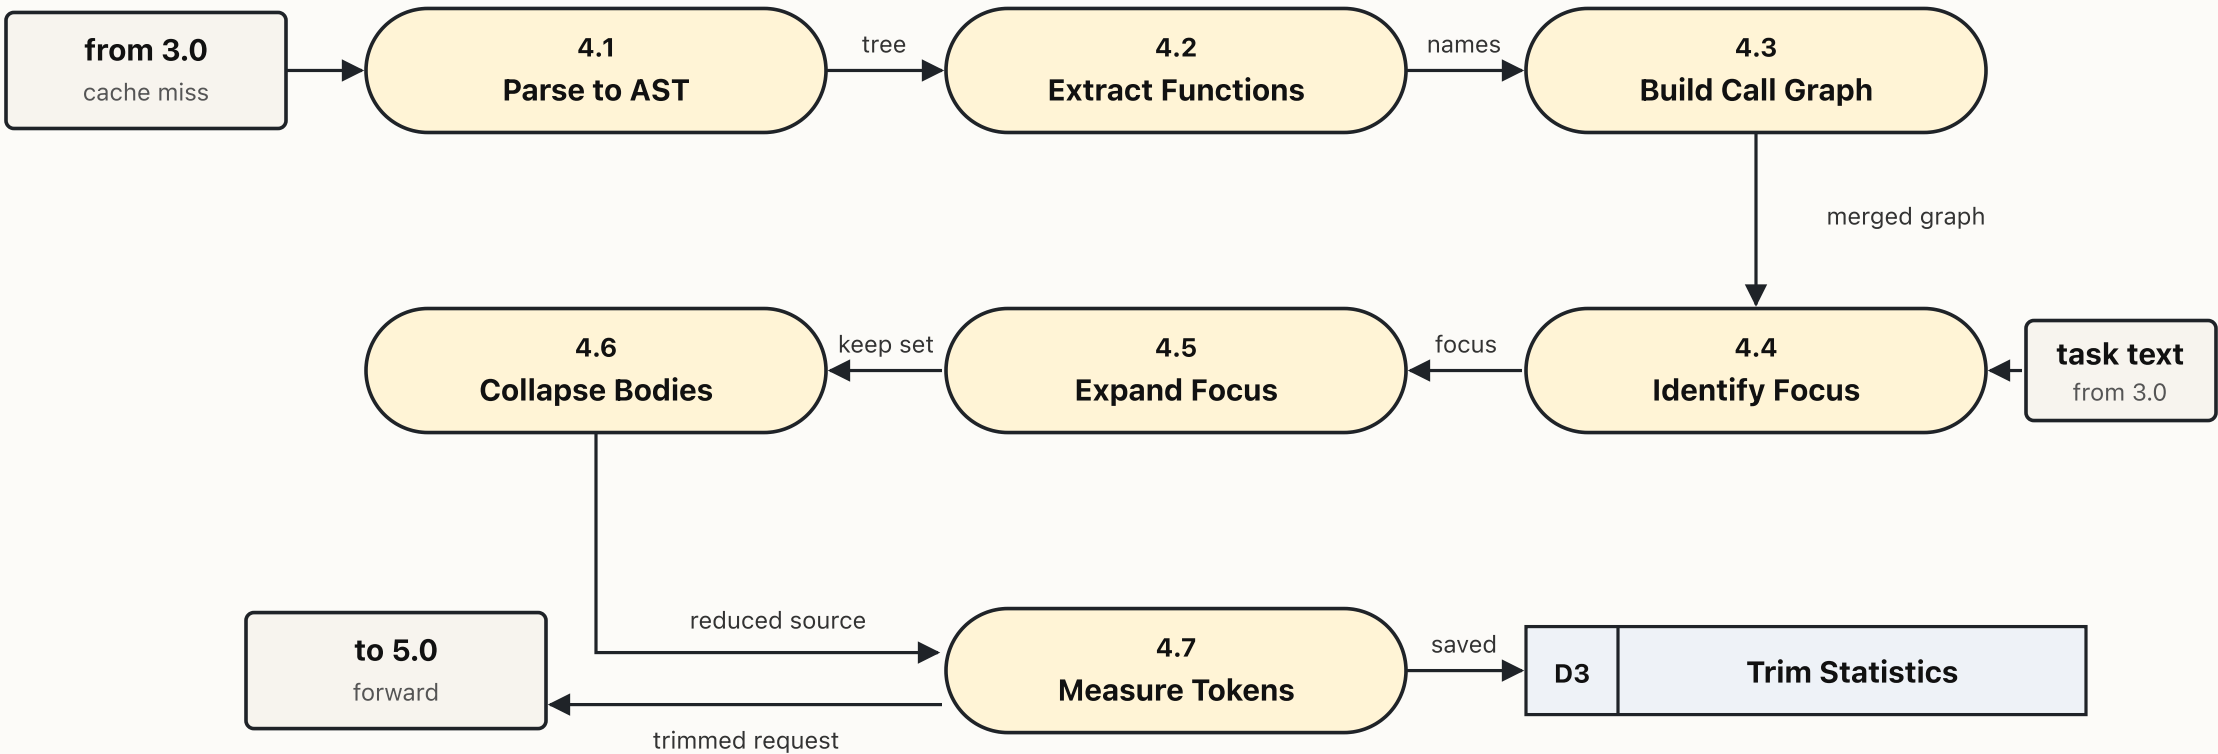

Level 1 — Gateway (expansion of process 0)

six processes and two data stores

Level 2 — Trim Context (expansion of process 4.0)

the compiler-aware trimmer, broken into its steps

Notation

external entity

process

data store

data flow

early return (cache hit)
